6. Recommendations and Growth Strategy

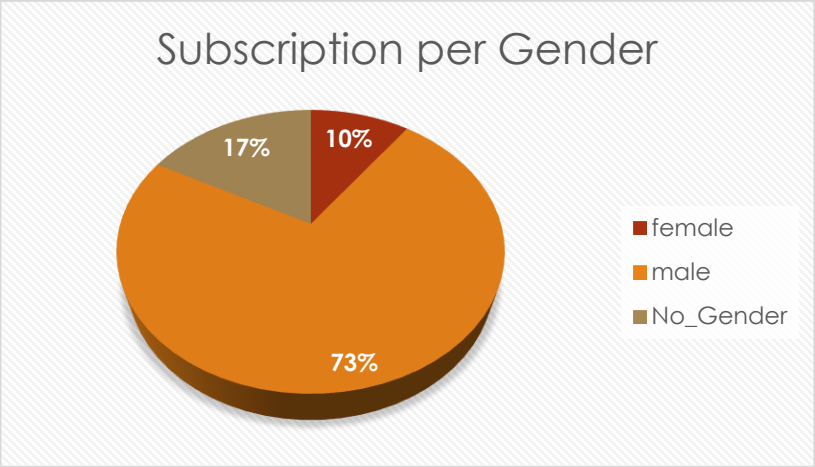
Business Overview and Project Objective

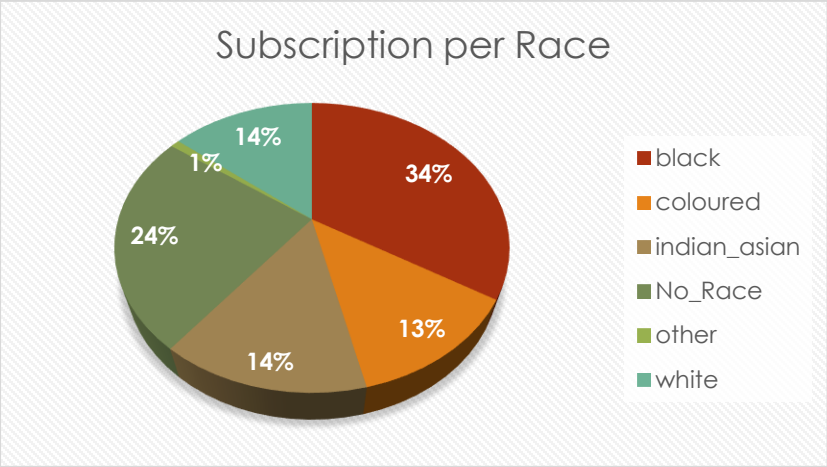
Bright TV has an objective to grow the company's subscription base for this financial year. A dataset containing user profile demographics and viewership transactions was provided. The aim of this project is to analyse the dataset and provide insights into the user trends and consumption drivers for Bright TV.

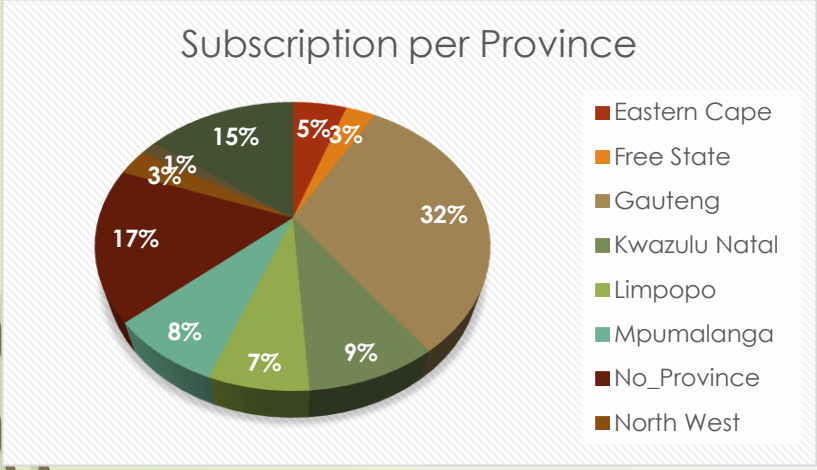
Methodology

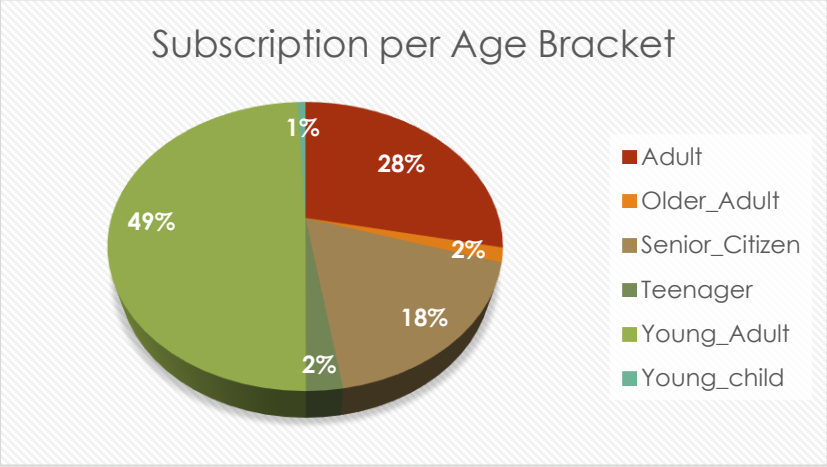
1. Raw unprocessed data was received from the Bright TV database
2. Two tables named user profiles and viewership were obtained
3. The data sets were loaded into data bricks and SQL (structured Quert Language was used to clean the dataset)
4. The data set contained numerous null entries which were handled using the SQL if null function
5. The dataset also contained numerous blank values (no entry values) which were handled using SQL CASE statement function
6. The viewership duration was converted from UTC to SA time

User Profile Insights



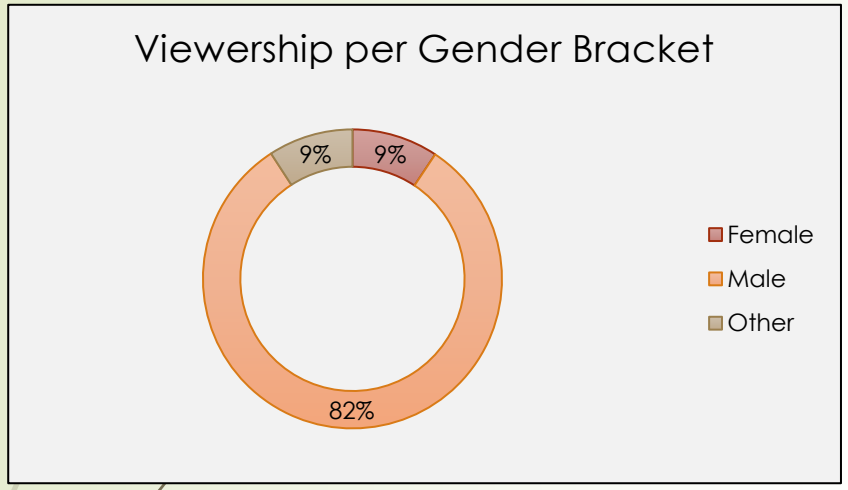


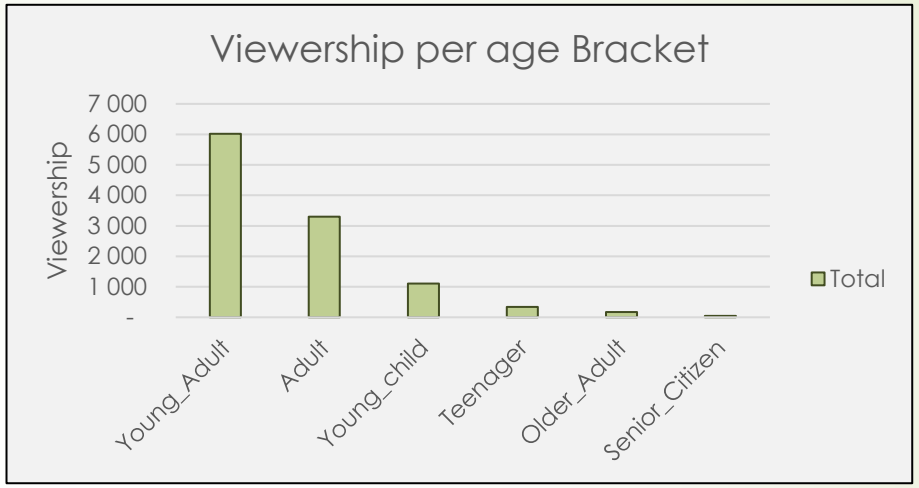


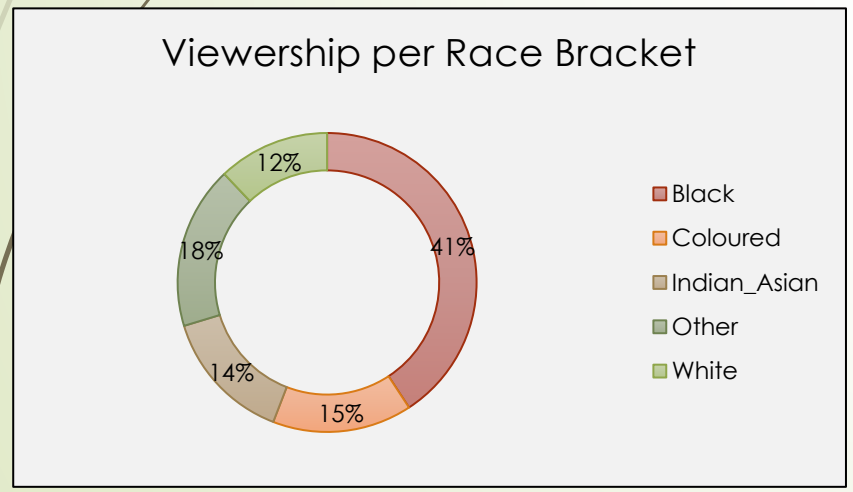


- Most of the subscriptions are by male viewers (73%)
- Black viewers (34%) are followed by Indian/Asian (14%) viewers
- Gauteng has the most subscriptions (32%)
- Young Adults (19-35 years) are 49% of Bright TV's subscriptions

Consumption Drivers

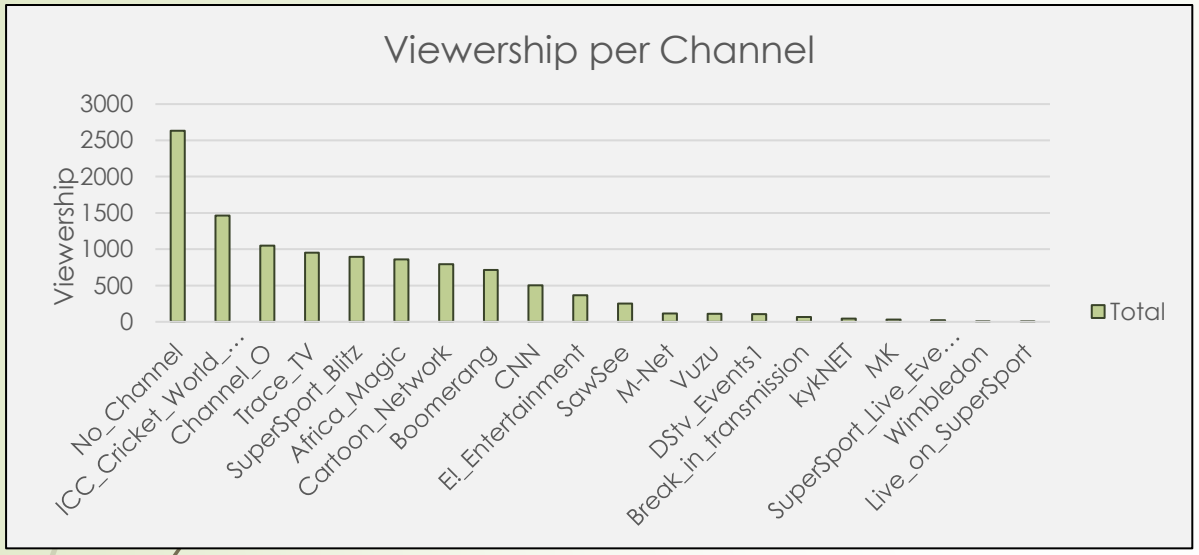


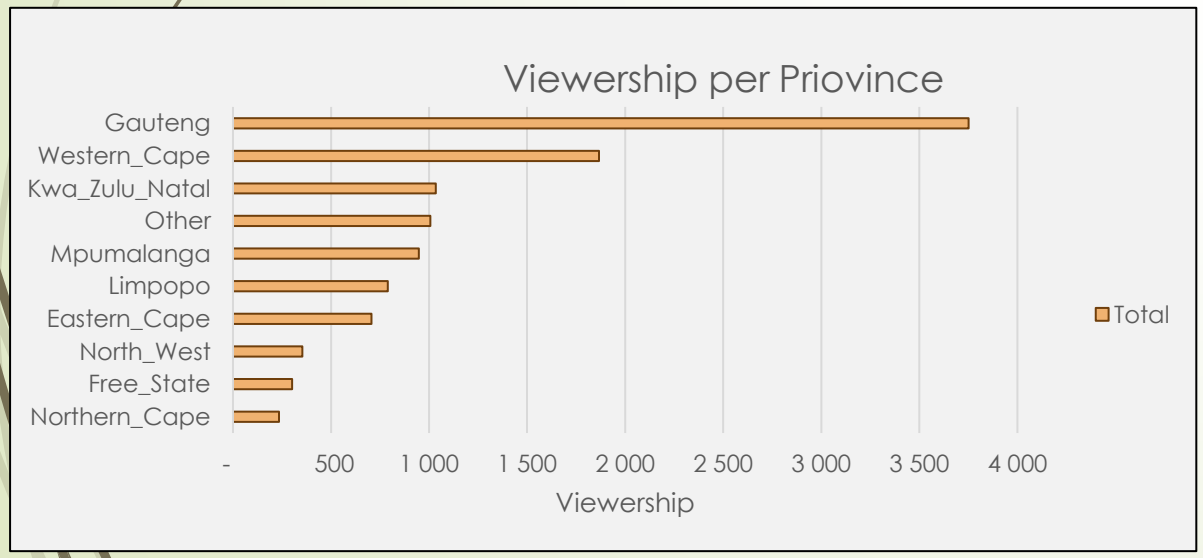




- Male users make up 82% of the total viewership with minimal female representation at 9%
- Black people make up 41% of the total viewership
- Young adults and adults are the majority of the viewers

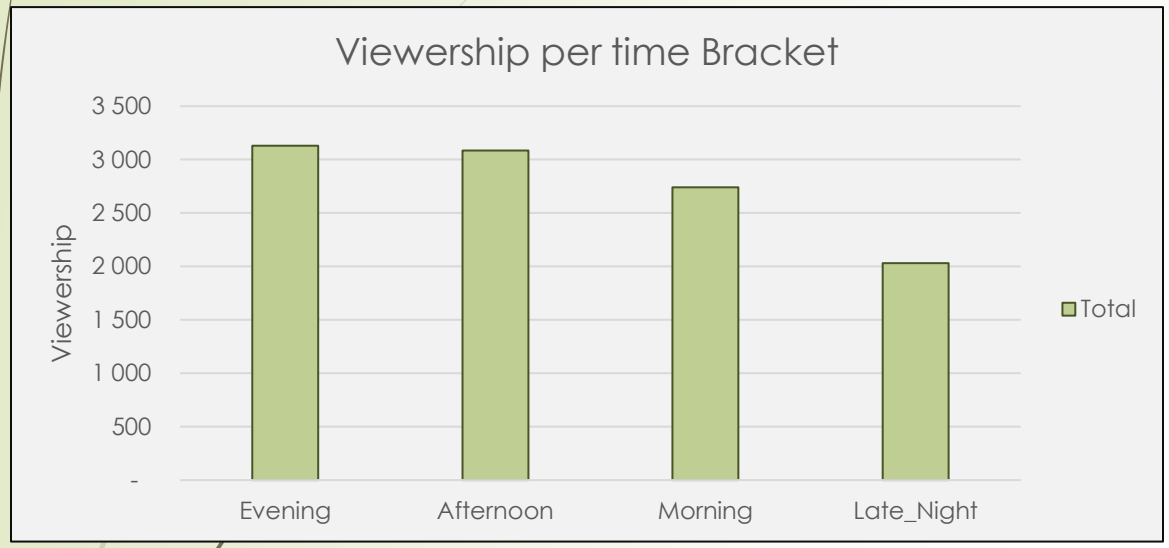
Viewership Insights





- Viewers don't complete the channel data thus the no channel bin
- Gauteng and Western Cape viewers are the majority of the viewership

Viewership Insights



- Viewers watch more tv in the evening than during late night hours

Recommendations

1. Introduce a notification strategy to target lunchtime and evening reminders
2. Introduce short-form-content falling between 5-15 minutes (Comedy clips, highlights and recaps)
3. Double up on sports content, local drama series and reality Tv
4. Expand female audience by including female lifestyle content, romance/drama and reality shows
5. Grow female subscription through female focused campaigns, surveys and influencer partnerships
6. Improve data quality, and encourage customers to fill in the information properly
